Welcome to North Lakes

The Montserrat Day Hospital team started with a vision of creating a truly unique day hospital environment that was warm and welcoming to patients, and a pleasure for nurses and doctors to provide premium hospital care.

Dr Peter 'Montserrat' Stephenson's vision was to put the hospitality back into hospitals, and the team at North Lakes are striving to do just that.

Providing services across Gastroenterology, Urology, Oral & Maxillofacial Surgery, Ophthalmology, Orthopaedic Surgery, Fertility Treatment, General Surgery, Ear Nose & Throat Surgery and Gynaecology, we can provide over 10,000 procedures annually from our state-of-the-art theatres.

Your sincerely,
Ben Korst - CEO

Hospital design and capabilities

Our global search for excellence in Sterilisation techniques has seen our CSSD area designed with a one way traffic flow and state-of-the-art pass through sterilizing equipment, imported directly from Europe. This is all serviced via a Reverse Osmosis treatment plant and highly skilled CSSD staff.

Providing the latest equipment to our Surgeon's allows us to ensure we facilitate the highest quality patient outcomes. To support this we have invested heavily in technology driven, scalable, robust medical equipment.

The staff at North Lakes are highly trained, patient focused and supported by a fantastic central team of managers.

The design of the Hospital sees patients entering surgery in a relaxed and confident state and leaving knowing they have received a standard of care that is unsurpassed.
