NORTH LAKES
—DAY HOSPITAL—

Be Our Guest

Welcome to North Lakes

The Montserrat Day Hospital team started with a vision of creating a truly unique Day Hospital environment that was warm and welcoming to Patients, and a pleasure for Nurses and Doctors to provide premium hospital care. We believe we have done just that.

With the help of Conrad Gargett Architects and two years in planning and construction, the new North Lakes Day Hospital has quickly set the benchmark in design for a premium private day hospital.

Dr Peter 'Montserrat' Stephenson's vision was to put the Hospitality back into Hospitals, and the team at North Lakes are striving to do just that.

With a host of new Specialists moving to the area, North Lakes is becoming known as the centre of Medicine in the North West

Corridor, with a population catchment of over 350,000 residents, which is forecast to rise to over 400,000 in the next decade, North Lakes is one of Australia's fastest growing regions.

Providing services across Gastroenterology, Urology, Oral & Maxillofacial Surgery, Ophthalmology, Orthopaedic Surgery, Fertility Treatment, General Surgery, Ear Nose & Throat Surgery and Gynaecology, we anticipate providing over 10,000 procedures annually from our 3 state of the art theatres.

We invite you to come and see for yourself what we have created. I particularly welcome your feedback.

Your sincerely
Ben Korst

CEO

Hospital Design and Capabilities

With the advances in Medical Technologies and Techniques, Day Hospitals are now servicing an even wider array of Surgical Disciplines. North Lakes has been designed to accommodate these changes today and into the future.

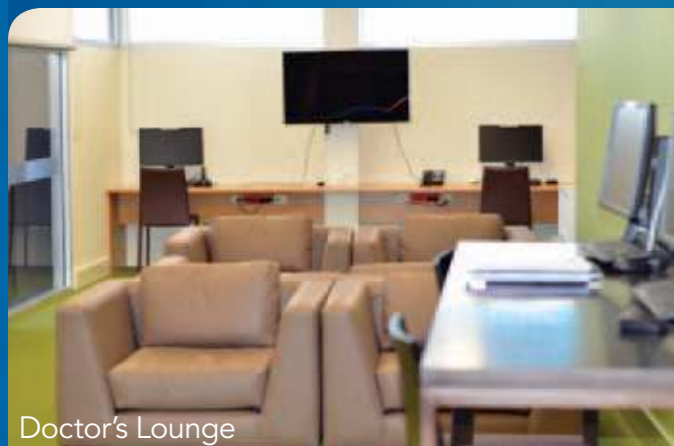

Our global search for excellence in Sterilisation techniques has seen our CSSD area designed with a one way traffic flow and state of the art pass through sterilizing equipment, imported directly from Europe. This is all serviced via a Reverse Osmosis treatment plant and highly skilled CSSD staff.

Providing the latest equipment to our Surgeon's allows us to ensure we facilitate the highest quality patient outcomes. To support this we have invested heavily in technology driven, scalable, robust medical equipment. Our Surgeon's will benefit from the likes of

Carl Zeiss Operating Microscopes, Olympus Endoscopy Suites, Stryker Operating Stacks and with the latest European Instrumentation in their hands, patients can expect excellent outcomes.

Supporting the Surgeon's and the Patients is a group of highly skilled Nurses. Under the Direction of Manager Sandra Moore (RN), and Director of Clinical Services Jane McGrath (RN), the staff at North Lakes are highly trained, patient focused and supported by a fantastic central team of managers.

The design of the Hospital sees patients entering surgery in a relaxed and confident state and leaving knowing they have received a standard of care that is unsurpassed.
